

NEWS HEADLINES

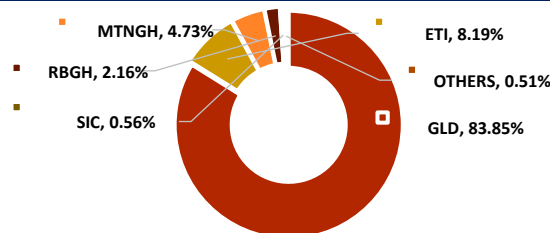

- ❖ **Ghana Taps China’s CNNC, US-Based NuScale for Nuclear Power Push:** Ghana has selected China National Nuclear Corporation (CNNC) and U.S.-based NuScale Regnum Technology as key vendors in its bid to develop nuclear energy, a move seen as a major step toward diversifying the country’s energy mix and achieving its net-zero emissions target by 2050. The decision underscores Ghana’s push to transition away from fossil fuels and strengthen energy security amid rising demand. Government officials argue that nuclear power will provide a stable and cost-effective electricity supply, complementing the country’s existing renewables and addressing gaps in hydroelectric generation. The selection of CNNC and NuScale reflects Ghana’s preference for vendors that offer financing mechanisms designed to mitigate the fiscal burden of nuclear integration. (Norvanreports)
- ❖ **Economic Governance Platform Launches Public Debt Stock and IMF Bailout Tracking Tools:** Ghana’s leading coalition of Civil Society Organisations (CSOs), the Economic Governance Platform (EGP), has introduced two online platforms aimed at enhancing transparency in the country’s public finance management. The Public Debt Tracker and the IMF Bailout Dashboard, launched on Thursday, February 13, 2025, will provide simplified and real-time data on Ghana’s public debt stock and the status of the country’s ongoing \$3 billion Extended Credit Facility (ECF) bailout from the International Monetary Fund (IMF). (Norvanreports)
